

What are the main challenges of Climate Change

To Farming Systems	To Farming Systems Research
<p>CC is more a collective problem than an individual one -> ex. Droughts</p>	<p>-> include power issues Diversify target groups, e.g. governments, interaction with farmers and other users</p>
<p>Proactive vs. re-active strategies</p> <ul style="list-style-type: none"> - What are proactive attitudes - Long-term considerations 	<p>New participatory approaches What are conditions for pro-activeness?</p>
<p>Change perspectives / include different fields of knowledge</p>	<p>Identify vulnerabilities / adaptive capacities / exposures/sensitivities</p> <ul style="list-style-type: none"> - Create options, alternative solutions - Consider physical, behavioural, cultural options <p>Comparative models for CC</p>
